

# SHAPE ROBOT

## 1. Draw a shape robot. Use all the shapes we've learned.

*Nariši robota iz vseh likov, ki smo se jih naučili (circle, square, rectangle, triangle, heart, star, oval, diamond).*

## 2. Colour all circles dark blue, squares green, rectangles orange, triangles purple, hearts red, stars yellow, ovals light blue and diamonds brown.

*Pobarvaj vse kroge temno modre, kvadrate zelene, pravokotnike oranžne, trikotnike vijolične, srca rdeče, zvezde rumene, ovale svetlo modre in vse rombe rjave.*

## 3. Describe your robot. How many circles, squares, rectangles ...? Write the numbers in words.

*Opiši svojega robota. Iz koliko krogov, kvadratov, pravokotnikov, ... je? Številke zapiši z besedo.*

My robot has \_\_\_\_\_ circles.
